HIGH BRIGHTNESS DISPLAYS

The SRM-8.4 Series are 8.4" High Brightness Displays. They feature at least 1000 nits brightness and a 4:3 aspect ratio. We design the SRM-8.4 Series monitors for use in direct sunlight. Consequently, they are also perfect for other high ambient-light conditions. They utilize state-of-the-art LED backlights. The models in this series produce at least 1,000 nits brightness. In contrast, this is over 3 to 5 times brighter than standard monitors. For example, standard monitors are only 200-300 nits brightness. The SRMH-8.4B-24 LCD high brightness model has 1,500 nits brightness! Therefore, the result is amazingly bright screen. This will provide you with crystal-clear images, even with bright, direct sunlight on the face of the screen. This 1000 nit monitor has a 4:3 aspect ratio monitor.

RUGGED 8.4" LCD MONITORS

The SRM-8.4 Series Sunlight Readable monitors are extremely rugged. For instance, we build them with true industrial-grade components. Furthermore, they receive our exclusive *TRU-Tuff* treatment.
